find that the more you read, the better you are able to learn writing styles and choose a distinct writing style for yourself. Also, you will discover that the more you write, the more you will become better at expressing your thoughts. Bear in mind that it takes time and effort to improve your essay writing skills, arm yourself with a can do spirit and consider the following practices.

- **Become a narrator**

You need not become a narrative expert to enhance your essay writing skills. Simply start by translating or narrating a page of your desired book, an inspiring speech and your favorite story in your native language. While at it, pay close attention to the word choices, the book structure and how the writer uses language transitions. Then, apply your new findings when writing essays for your school assignments. Narrating in English and your native tongue gives you a clear sense of English as well as the best ways to use certain phrases, idioms and words.

- **Analyze dissertations in your desired field**

There is a need for you to read some dissertations and research papers throughout your academic years. You can find them in a library or order custom samples at [TakeAwayEssay.com](https://www.TakeAwayEssay.com) to get into an easy way to better grades. Consider analyzing the research papers and dissertations word by word; don't just glance through. When a research paper interests you, endeavor to read it thoroughly so you can examine how the author writes. At the same time, you'll be guided by the writing style of the author. Reflect on

the influence of the author's introduction and how he/she communicate ideas. Be conscious of what you read, don't just read for reading sake. Remember, you want to identify the writing style of the author. Feel the writing style and flow of the author, and apply your new findings to your writing. Soon you will discover that by doing this, you will be able to improve your essay writing.

- **Don't ignore your college writing center**

You might also wonder: "Shall I try a writing center to improve my writing skills?" In fact, working closely with a writing tutor works in many ways than you can imagine. Should you have a tight schedule and unable to find time to visit your college writing center for guidance on your essays before the due date to turn in your assignments, schedule an appointment that falls within your schedule. While the writer tutor might not help with editing and proofreading, they can help you highlight the errors you frequently make in your essay and give you several alternatives for your wrong word choices. Also, they will show you examples of how to use new words and how you can make your sentences correct and more graceful. Most students enjoy the time they spend with their writing tutor and gain a lot of benefits of this collaboration.

We won't fail to mention that working on improving your essay writing skills will not yield great results overnight. No! It doesn't happen immediately. It takes a long process, as a matter of fact, it is a long process of becoming conscious of good writing, developing your writing style, writing regularly,

understanding what good writing is and applying your findings in your writing.
